

.....
WEDNESDAY OCTOBER 10, 2007! ANYTIME, anywhere
Spin a top or tops for the

INTERNATIONAL TOP SPINNING DAY

~A WORLDWIDE CELEBRATION~

.....**Free to take part!**

Join in, wherever you are

Be part of a worldwide event.

Help get 10,000 (or more) tops spinning around the world
YES, THE WORLD IS A BIG SPINNING TOP!
CELEBRATE & RECOGNIZE THIS SCIENTIFIC FACT.

-
- **SPIN A TOP (OR TOPS)** Get a group, school, neighborhood, place of work, or your family to take part. Post a sign about it, so everyone knows you are celebrating the earth as a top!
 - **Did you know** that National Public Radio has talked about International Top Spinning Day and Nick, Jr. Magazine has written about it! Past participants have been from Poland, Montana, France, Wisconsin, Malta, South Africa, France, Switzerland, Oklahoma, Iowa, and more!
 - **Teachers & students:** ask your class or entire school to take part, ask students to bring in tops a few days before Oct. 10 so you are ready, or provide a set for everyone to use.
 - **Science:** it's physics
Social Studies: it's a universal toy found in every culture, Spanish children call tops trompos
Math: calculate how many spins if everyone in your school spins a top 2 x or 3x
Geography: map all of the locations after the results are in from around the world
Observations: what other things spin
 - **Spin in UNUSUAL PLACES, too.** (Family rated, of course.) On top of the playground slide, on a boat or plane, in the school lunch room, in the middle of the gym floor, on a CEO's desk, or? We will list as many different places used, appropriate ones only.
 - **AFTER: Please Email** a small jpg photo, your comments, where you are (School name (grades, teacher's name), City, State & Country), how many people took part, and how many tops were spinning, and where you spun tops. (Each new spin counts toward the total) We will add you to the total... striving for at least 10,000 spinning tops spins! Last year there were more than 35,000 spins. We may post some photos and a list of facts on our website afterwards
